

PRESS RELEASE

In light of the heated media discussions and information being taken out of context we would like to make the following clarifications:

- 1) On the 7th November **Universa Hub Africa** have launched **uDinar**, backed by Tunisian Dinar, as a Proof-of-Concept.
- 2) The PoC app is using decentralized ledger technology based on local blockchain hosted by Tunisian Agency of Internet. The Agency is our partner in terms of Universa Solutions in Tunisia.
- 3) **Universa Hub Africa** was invited as a tech partner to showcase its project at the the Forex Club Tunisie Congress.
- 4) No question of **CBDC** émission related to uDinar was discussed at the Forex Club Tunisie Congress.
- 5) **BCT** is considering a variety of alternatives for future currency digitalisation and has no contractual aspect on **CBDC** with Universa Hub Africa.
- 6) The misinterpretation in the articles that followed was not based on claims of Universa's or **BCT** official representatives.

Universa is hoping for the further development of the mutually beneficial cooperation between **Universa Africa Hub** and **BCT**.

Alexander Borodich
Founder of Universa Blockchain
